Phuket is well known as it is one of the most beautiful island around Thailand "Pearl of Andaman" The island has some stunning beaches, beautiful nature, great entertainment and interesting culture which are some of the reasons why it is very attractive to people. But the people who visit Phuket don't just come to visit the beautiful beaches or experience its nice culture. They can also enjoy the numerous health and beauty options which are available. Phuket has plenty of spas, massage shops, houses of beauty and entertainment centers. Some of these places may have a license but some may not. To obtain the license legally the places have to be verified by the Phuket Health Office and pass the verification.

This includes checking the buildings, the location, the specialist and the products which are used. Therefore the visitors can be assured that they will get a good standard of service and the area is kept clean and safe at all the times.

We believe that you will get the best spa service from your chosen destination shown on the map provided.
